Unit 1

UNIT 1 What are Open Badges?

Concept

Basic ideas and roles in the Open Badges ecosystem

Benefits

Features that make Open Badges special

Practical Use

Environments in which Open Badges are used

Main Objectives

Knowledge has become crucial and the future is full of unknown, but one thing is clear, learning has become easier, more accessible and a powerful tool to stand out.

Open Badges are a powerful tool to certify knowledge, skills, and achievements. Open Badges help motivate earners to pursue lifelong learning.

UNIT 3 What are Open Badges used for?

Application fields

Common contexts in which Open Badges are used

Certified skills

Examples of skills certified with Open Badges

Best Practice

Get inspired by existing Open Badges projects

UNIT 2 Why do Open Badges exist?

Credentials

Purpose and history of credentials

History

Context and chronicle of the Open Badges standard

Comparison

Benefits of Open Badges over other forms of credentials

Co-funded by the Erasmus+ Programme of the European Union

Outcomes

The MOOC consists of three lessons with three units each.

The first lesson **Foundations of Open Badges** will introduce you to Open Badges. You will get to know the concept, context, and practical application fields of Open Badges.

LESSON 1

Foundations of Open Badges

A question of data

MOOC on the basis of Research Data Management coming soon

MOOC on Research Data Management and sharing (RDM) is soon to be completed. It is currently being proofread and will soon be published on the [EMMA platform](#).

DARIAH Research Data Management Working Group

 **DARIAH-EU**

Research Data Management

Our OBERRED colleague Marta Błaszczczyńska (IBL PAN) is also the co-chair of the [DARIAH Research Data Management Working Group](#) which was created last year to bring together researchers, representatives of the GLAM sector, RDM practitioners (such as open science officers and data stewards) and everyone interested in data management in the Arts and Humanities

MOOC on the basis of Research Data Management: focus on the DMP

The DMP has become a widespread management tool. It is increasingly recommended or required worldwide. It is also a project management tool that facilitate the organization and description of data. It allows to define responsibilities, resources and produce FAIR data.

Co-funded by the
Erasmus+ Programme
of the European Union
